RSC Architects

Press Release

Michael Bet, AIA, Receives CDT Certification

Cliffside Park, NJ, August 1, 2009: Michael Bet, a Project Architect with RSC Architects in Cliffside Park, New Jersey, recently became a certified Construction Documents Technologist (CDT) through the Construction Specifications Institute (CSI), a national association dedicated to creating and upholding construction document standards. CSI conducts the Construction Documents Technology Program, which provides a comprehensive overview of the construction process, contractual relationships and the use of construction documents. Completion of this program benefits anyone who writes, interprets, or manages construction documents. Through rigorous coursework and a final examination, Mr. Bet achieved his CDT certification, which is one of the top industry-recognized professional qualifications. In addition, Mr. Bet received 40 continuing education units for his AIA licensure by completing the course. His certification and increased ability to understand and interpret construction documents will not only benefit him, but also help the entire RSC team improve project delivery and perform their jobs more effectively.

Mr. Bet has 24 years of experience in the construction field and has been employed with RSC Architects since 2000. As a Project Architect, he is involved with a project during its design phase, handling such responsibilities as field measuring, schematic design and design development drawings. As a member of the RSC team, he is responsible for the development and coordination of construction documents, ensuring consistency and accuracy with any consultants' drawings. Mr. Bet has a Bachelor of Architecture degree from Pratt Institute and a Bachelor of Arts degree from Fordham University. He is a licensed architect in New Jersey, and is an active member of the American Institute of Architects (AIA). In addition, Mr. Bet is a member of the Waldwick (NJ) Volunteer Fire Department.

Founded in 1971, RSC Architects is a full-service architectural firm that provides programming, planning, external and interior design, and construction administration. More information about the company can be found at www.rscarchitects.com.
